

# 4 Tips for buying sustainable furniture

1

## Consider what you already have

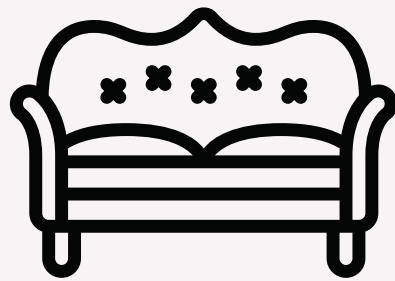

Do you already own something that could be repaired, repainted, or reupholstered?

## Look for preowned

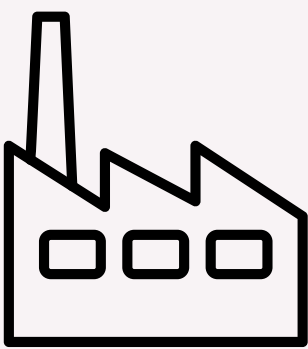

Check out antique shops or online preowned furniture sites for unique, sustainable pieces.

2

3

## Research the company

Some furniture companies have better sustainability practices in place. Learn more and support the good ones.

## Focus on classic, quality pieces

Purchasing timeless pieces that are made to last means you won't have to replace them as often in the future.
